Turtlerock Greentech LLC is a venture development & consulting firm focused on sustainable transportation and renewable energy technologies.

Turtlerock partners with IP sources and clients with proven green technologies, which have often been in development for 10 years or more. Currently, Turtlerock is accelerating and commercializing the following platform green technologies:

- Alloy Foam Energy Applications (supercaps, fuel cells, hydrogen reformers)
- Li-ion Battery Materials
- Hydro-kinetic Power
